Halophila

Habitus and growth type

Plant height [m]: **0.3**
Life span: **Perennial**
Life form: **Hydrophyte**

Leaf

Specific leaf area [mm^2/mg]: **42.2**

Flower

Flowering period: **June-August**

Trophic mode

Carnivory: **non-carnivorous**

Taxon origin

Origin in Europe: **neophyte**

Habitat and sociology

Broad habitat

Occurrence in broad habitats: **Marine, Coastal saltmarsh, Saline vegetation**
