# *Pedicularis dasyantha*

## Fruit, seed and dispersal

Dispersal mode: **Local non-specific dispersal**

## Trophic mode

Parasitism and mycoheterotrophy: **euphytoid hemiparasite**
Carnivory: **non-carnivorous**
Symbiotic nitrogen fixation: **no nitrogen-fixing symbionts**

## Taxon origin

Origin in Europe: **native**

## Ecology

### Disturbance indicator values

Disturbance frequency: **1.46**
Disturbance frequency (herb layer): **1.46**
Disturbance severity: **0.31**
Disturbance severity (herb layer): **0.31**
Mowing frequency: **0**
Grazing pressure: **0.25**
Soil disturbance: **0.04**
